The compatible Solution **HARTING M8 D-code**

HARTING M8 D-code.

Small size big advantages.

The HARTING M8 D-code is more than just a new connector – it is also a complete system for connecting miniature sensor technology to Ethernet networks. It has been designed to handle the high bandwidths and demanding industrial conditions found in Integrated Industry.

30% smaller than a conventional M12 connector

100 Mbit/s Cat. 5 Fast Ethernet IEEE 802.3

Robust design according to IP67

Shielded solution

PoE enabled

Supports PROFINET

The new small size for
industrial Ethernet connections.
HARTING M8 D-code.

Digitalized production environments are relying on more and more sensors. At the same time, this sensor technology is becoming smaller. HARTING's M8 D-code provides a solution for the challenges presented by miniaturization. The vision of an Ethernet connection from the cloud all the way down to the smallest sensor technology is becoming a reality with this new standard.

In comparison to the classic M12 connectors, the M8 D-code is 30% smaller. It also enables high-performance Fast Ethernet connections of up to 100 Mbit/s Cat. 5 according to IEEE 802.3. The M8 D-code is shielded and protected to IP67 so that it can guarantee excellent reliability and data integrity under raw field-level industrial conditions.

Machinery & Robotics

Automation

HARTING's M8 D-code enables a consistent Ethernet connection from the cloud to the sensor level.
